

Dmitry Ginzburg · Product Designer

Haifa, Israel · [+972-53-356-9957](tel:+972-53-356-9957) · dima@ginzburg.work · [portfolio](#) · [github](#) · [linkedin](#)

SUMMARY

Product Designer with 8+ years of hands-on design work — and a decade of running businesses before that. I came to design from operating roles, so I design through business logic: monetization flows, access rules, conversion-critical UX, scalable design systems. Today I work AI-native, building design workflows around agentic tools and shipping my own AI-assisted products.

SKILLS

Product & UX: User flows, interaction design, information architecture, design systems, prototyping

Research & Validation: Jobs-to-be-Done (JTBD), Customer Journey Mapping (CJM), user interviews, A/B testing

UI & Visual: Layout, typography, component-based design, visual consistency

AI & Agentic: Codex, Claude Code, Cursor, Windsurf, Figma MCP, agentic workflow design

Tools: Figma, Sketch, Framer

EXPERIENCE

Founding Product Designer — [Megamod](#)

USA · Aug 2023 – Nov 2025

Early-stage UGC game platform preparing for institutional fundraising and external positioning.

- Led product design for a UGC game platform — flows, design system, and external-facing product narrative
- Structured product narrative, flows, and information to explain a complex platform to investors
- Defined product positioning and communication across external touchpoints
- Built a consistent visual system across all materials
- Contributed to a \$7M funding round at a \$25M valuation
- Improved production workflows, reducing turnaround time by 30–40%

UX/UI Designer — OnlySpace

UAE · Feb 2022 – Mar 2023

Web3 game publisher (Xsolla, Com2us). Designed end-to-end UX for limited-supply NFT sales, including access logic, eligibility rules, and purchase flows.

- Built user journeys and purchase flows with clear access logic and constraints
- Developed and tested multiple sale models, influencing monetization and distribution strategy
- Result: \$6M+ in sales volume and 16K NFTs sold

Product Designer — OCRV / Russian Railways

Russia · Feb 2020 – Jan 2022

Enterprise platform (3M+ users, 10+ internal services: booking, travel, document management and workflow systems).

- Redesigned UX across multiple services, simplifying workflows and improving usability at scale across 10+ internal services
- Defined interaction patterns across B2B, B2C, and operational tools
- Result: ~200,000 hours saved annually, ~\$3M cost reduction

Narrative UX Designer (Contractor) — [Prostor](#)

Russia · Jan 2017 – Feb 2020

Product development and design agency.

- Led discovery workshops with founders and teams
- Translated business goals into product concepts and UX prototypes
- Supported early-stage product validation

AI & AGENTIC WORK

- Designed and shipped browser-based product tools using AI-assisted development: an ATS resume parseability checker, a design-token auditor
- Developing "agent-native design systems" methodology — design tokens and components structured for consumption by AI agents, not only humans

EARLIER CAREER: OPERATING & EXECUTIVE ROLES

- C-level roles in e-commerce/marketplaces: growth, fundraising support, strategic initiatives (E96, Logo)
- C-level role in game publishing: marketing, distribution, go-to-market for published titles (iJet-Media)
- Editor-in-Chief and executive editorial roles: content strategy and audience growth (Kommersant-Yekaterinburg, Delovoy Kvartal, Business and Life)

EDUCATION

BA in Journalism — Ural Federal University (UrFU), Yekaterinburg, Russia

1998–2003

Courses: Google UX Design (Coursera) · CalArts Graphic Design (Coursera) · Mini-MBA (CEEMAN / Adizes partner)

SELECTED PORTFOLIO

- [Megamod](#) — Scaling product complexity through a unified communication layer (UX/UI Design)
- [Russian Railways](#) — Turning a complex internal booking process into a predictable, repeatable system (Product Design)
- [Russian Railways](#) — Designing a component-driven interaction system under legacy constraints (Product Design)
- [Greek Vacation](#) — Helping users move from vague intent to confident booking (UX/UI Design)
